

CYBERASSURANCE

COMPLIANCE, ENGINEERING AND LIFE-CYCLE SOLUTIONS

Securing both sensitive and cleared enclaves, our CyberAssurance workforce and proven approach provides full life-cycle solutions that secure your mission, increase compliance and cost-effectively reduce risk.

STRATEGY & GOVERNANCE

Developing comprehensive cybersecurity programs through multi-sector experience, our seasoned professionals provide fully-framed solutions that define organizational risk tolerance and enable the mission through integration of portfolio management, development lifecycle, acquisition, and change management processes.

SECURITY ARCHITECTURE DEVELOPMENT & ENGINEERING

Providing assured cyber and information protection capabilities through strategic architecture design and the integration of core cybersecurity principles of Protect, Detect, Respond & Recover, and Sustain.

RISK MANAGEMENT FRAMEWORK

Enabling organizations to make risk-based decisions regarding which cyber

assets to deploy and how to maintain their protection. Our experts design and execute National Institutes of Standards and Technology (NIST) compliant programs in civil, defense or national security enclaves.

DEFENSIVE CYBER OPERATIONS

Delivering leading edge protection capabilities that enable vigilant maintenance and situational awareness, our highly experienced and certified resources provide proven defenses for your most sensitive cyber assets.

CYBER INCIDENT RESPONSE & RECOVERY

Rapid response, isolating threats, and restoring cyber assets to base-line performance, our CyberAssurance professionals provide comprehensive and efficient solutions to respond, recover and maintain your operations.

SOLUTIONS & SECURITY

▶ PROVIDING FULL LIFE-CYCLE SOLUTIONS TO SECURE YOUR MISSION, INCREASE COMPLIANCE AND COST EFFECTIVELY REDUCE RISK

THE TRUE DIFFERENCE

A comprehensive IA program that is effective and transformative requires more than engineers, analysts, and administrators. It requires an innovative approach that brings together a capable cyber security workforce and forward-looking cyber strategists that can quickly analyze patterns and threat evolution to develop solutions that defend against advanced adversaries.

Our approach includes the right balance of cybersecurity and Information Assurance Subject Matter Experts along with Business Strategists, Business Process Engineers, and Project and Performance Management professionals to provide a holistic and comprehensive IA program that is scalable to meet both today's and the future's needs.

CYBERSPACE (STRATEGY, POLICY, ARCHITECTURE, CONTROLS, AND EVALUATION)

Our CyberSPACE solution is a proven technical approach to provide a comprehensive Information Security program. It leverages the foundational guidance provided by NIST 800-39 and 800-37 for managing organizational risk and implementing the Risk Management Framework yet optimized as a result of over 15 years experience managing effective and efficient IA and programs for both Defense and Civilian agencies.

Its benefits allow for implementation of a comprehensive information security program that is fully compliant with multiple cyber and privacy regulatory requirements, all within a single framework. CyberSPACE allows your organizational focus to remain on mission objectives with assured information system support. We provide a full life-cycle solution to secure your information resources, increase compliance, and cost effectively reduce risk.

SERVICES

- Strategy and Governance
 - Policy Consulting
 - Technology Portfolio Management
 - Acquisition Management
 - Business Impact Analysis
- Security Architecture Development and Engineering
- Risk Management Framework
 - Assessment and Authorization (A&A)
 - Continuous Monitoring
- Defensive Cyber Operations
- Cyber Incident Management, Response and Recovery
